

Services: Audio Production & Logistics

“We don't need hand-holding. Once they make that first phone call to us we'll take care of the rest so they can focus on their event, knowing the audio is in good hands.”

Audio Production & Logistics

You can focus on other aspects of your event knowing that your sound needs are in the hands of our qualified staff. We make certain that the planning and delivery of equipment is accurate and on time and that the set-up of all equipment is on schedule. In addition, our staff will ensure that the audio production during your event is flawless and, when the event has been completed, that we leave the facility the way we found it.

1. Equipment Planning – Proper planning of the necessary audio equipment is critical in keeping all aspects of the event on schedule. The Goodman Audio staff has the experience to make certain that there are no unexpected delays in the delivery and setup.

2. Delivery of Equipment – Our event trucks are readily available and give us the flexibility necessary to get all audio equipment and personnel to the event facility on time, if not ahead of schedule. And because we make professionalism a priority, we keep our event trucks looking their best and our equipment and cases clean and clearly marked.

3. Set-up and Operation – Once all audio equipment has been successfully loaded into the facility and placed in the appropriate locations, the Goodman Audio crew work diligently to install the equipment, run cable, analyze the system to the acoustics of the room, all while making certain that the entire audio system works as it was designed. Each crew member brings their own experience and expertise to each event and contributes to the entire team which represents a wide range of capabilities and specialties.

4. Strike and Pick-up – After your event, the staff will begin the process of striking and moving all audio equipment from the facility to our waiting event trucks. You can be assured that we will work in an efficient and orderly manner leaving the facility the way we found it.
